

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 13, 2004 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was moderate in the Southern California Area and light elsewhere. Nationally, 216 fires were reported. Five new large fires were reported, two in the Southern California Area, and one each in the Eastern Great Basin, Northern Rockies and Southern Areas. Three large fires were contained, one each in the Southwest, Eastern Great Basin, and Rocky Mountain Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Florida, Idaho, Nevada, New Mexico, Oklahoma, Texas, Utah and Wyoming.

ALASKA AREA LARGE FIRES:

EVANSVILLE, Tanana Zone, Bureau of Land Management. This fire is one half mile southeast of Bettles, AK in black spruce. Hot, dry weather and strong winds resulted in extreme fire behavior, including spotting and crown fire.

BOUNDARY, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 1 Incident Management Team (Hart) is assigned. This fire is 20 miles northeast of Fairbanks, AK in alpine tundra and black spruce. Fire behavior was active. Torching and crown runs were reported with spotting over one quarter mile.

TAYLOR COMPLEX, Tok Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This complex, comprised of the Wall Street, Billy Creek, Gardiner Creek, Big Creek, Anomaly, Chicken and Porcupine fires, is 35 miles northwest of Tok, AK in black spruce and tundra. Fire behavior was extreme with torching and crown runs reported.

EAGLE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Cones) is assigned. This complex, consisting of the American Summit, Edwards Creek, King Creek, Kandik River, Indian Grave Creek, Deer Creek and seven additional fires, is located three miles northeast of Eagle, AK in tundra, black spruce and mixed hardwoods. Fire activity increased due to hot, dry conditions. Group tree torching, short crown runs and spotting were observed on exposed areas.

SOLSTICE COMPLEX, Upper Yukon Zone, Bureau of Land Management. A Fire Use Management Team (Bird) is assigned. This incident is 57 miles northwest of Fort Yukon, AK in black spruce and tundra. The complex consists of the Pingo, Winter Trail, Sucker River, Black Currant River, Vundik Lake, Boulder Creek and Sheenjok fires. Fire behavior was extreme with multiple mass convection columns observed on the heads of both the Pingo and Winter Trail fires. Long range spotting in front of the fire heads occurred.

WALDRON CREEK, Upper Yukon Zone, Bureau of Land Management. This fire is ten miles east of Stevens Village, AK in black spruce and tundra. The south flank of the fire was active.

WOLF CREEK, Upper Yukon Zone, Bureau of Land Management. This fire is 60 miles northeast of Fairbanks, AK in black spruce and hardwoods. The fire actively burned into the wind. Uphill runs with short range spotting were observed.

CAMP CREEK, Delta Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Stegmier) is assigned. This fire is 23 miles northwest of Delta Junction, AK in tundra and spruce. Numerous ground fires were active along the fire perimeter.

LOWER MOUTH, Upper Yukon Zone, Bureau of Land Management. This fire is located 12 miles northwest of the village of Birch Creek, AK in white spruce, black spruce, birch and aspen. No other information was received. This will be the last narrative report unless significant activity occurs.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

VERBENIA, Riverside Unit, California Department of Forestry and Fire Protection (CDF). A Type 2 Incident Management Team (McCormick) is assigned. This fire is 10 miles northwest of Palm Springs, CA in grass and chaparral. Extreme fire behavior was observed, including long distance spotting. The fire made several runs upslope out of the Snow Creek drainage to the south.

GATOS, Fresno-Kings Unit, California Department of Forestry and Fire Protection. This fire is 13 miles northwest of Coalinga, CA in chaparral. Extreme fire behavior was observed.

PETERSON, Fresno-Kings Unit, California Department of Forestry and Fire Protection. This fire is 30 miles northeast of Fresno, CA in timber and brush. Extreme fire behavior was reported. This included long distance spotting, torching and crowning.

PINE, Los Angeles County Fire Department. This fire is 14 miles southeast of Lebec, CA in heavy brush. Fire behavior was extreme with several runs reported.

SOUTHWEST AREA LARGE FIRES:

NUTTALL COMPLEX, Coronado National Forest. A Type 1 Incident Management Team (Oltrogge) is assigned. This complex, located 15 miles southwest of Safford, AZ in brush and heavy timber, consists of the Clark, Nuttall and Gibson fires. Portions of the fires received heavy precipitation. Fire behavior was minimal.

WILLOW, Tonto National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is six miles southwest of Payson, AZ in timber, grass and chaparral. Fire activity was minimal with active fire areas located in steep terrain.

JACKET, Coconino National Forest. This fire is 13 miles southeast of Winona, AZ in grass, juniper and pinyon pine. No new information was received.

TNF = Tonto National Forest

NORTHWEST AREA LARGE FIRES:

POT PEAK, Okanogan/Wenatchee National Forest. A transfer of command will occur from a Type 1 Incident Management Team (Lohrey) to a Type 2 Washington Interagency Incident Management Team (Johnson) at 1800 PDT. This fire is 15 miles northwest of Chelan, WA in timber. Fire activity was minimal.

FREEZEOUT, Okanogan/Wenatchee National Forest. This fire is 65 miles northeast of Bellingham, WA in timber. Fire behavior was minimal.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

ROCKY MOUNTAIN AREA LARGE FIRES:

SADDLE MOUNTAIN, Delta County. A Type 2 Incident Management Team (Mullenix) is assigned. This fire is five miles east of Crawford, CO in Douglas fir, oak brush, aspen and pinyon pine. Fire behavior was minimal with some individual tree torching reported.

OIL SPRINGS, White River Field Office, Bureau of Land Management. A Fire Use Management Team (Weldon) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is 27 miles south of Rangely, CO in pinyon pine, juniper, sagebrush and grass. Some surface fire with isolated torching was observed. Reduction in acreage is due to more accurate mapping.

CPX = Campbell County, Wyoming

WESTERN GREAT BASIN AREA LARGE FIRES:

CHROME, Ely Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Muir) is assigned. This fire is 45 miles northwest of Ely, NV in pinyon pine, juniper, sagebrush and grass. Fire behavior was moderate. Hot spots became active in the afternoon. Short runs were observed in unburned islands.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
CHROME	NV	ELD	4,500	90	7/13	406	11	5	3	0	814K

EASTERN GREAT BASIN AREA LARGE FIRES:

TRAIL CANYON, Moab Field Office, Bureau of Land Management. This fire is 40 miles north of Green River, UT in Douglas fir, pinyon pine, juniper and mountain mahogany. Active fire behavior with uphill runs through heavy fuels was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

PAYHAYOKEE NORTH	FL	EVP	1,000	0	UNK	4	0	0	0	0	2.1K

OUTLOOK:

RED FLAG WARNING: For the lower east slopes of the Washington Cascades for isolated to scattered thunderstorms.

Weather Discussion: Warming trend continuing over the West as high pressure builds over the region. Monsoon moisture will spread into the southern California mountains and deserts, southern and eastern Nevada, Utah and Colorado. In the Pacific Northwest, southerly flow aloft will bring enough moisture and instability for a threat of thunderstorms mainly along and east of the Cascades. High pressure over Alaska will continue the warm and dry weather over the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
ALASKA AREA Central and Eastern Interior Partly cloudy. A chance of thunderstorms in the Brooks Range in the afternoon.	Central and Eastern Interior 70 to 90.	Central and Eastern Interior 20 to 37%.	Central and Eastern Interior Southwest 10 to 15 mph with some gusts to 20 mph over higher terrain.
SOUTHWEST AREA Partly cloudy. Widely scattered to scattered thunderstorms eastern and central AZ, western and northern NM.	Upper 60s to 80s mountains and mostly 90s lower elevations, except 100 to 105 southern, western AZ deserts.	5 to 20% much of AZ, 15 to 30% southern, eastern AZ, much of NM and 20 to 35% west TX.	East to southeast 5 to 15 mph with higher gusts much of NM into eastern AZ, west to southwest 5 to 15 mph western and northern AZ, south to southeast 10 to 20 eastern NM and west TX.
NORTHWEST AREA Isolated to scattered thunderstorms likely over and east of the Cascades in Washington and Oregon.	Hot: Highs in 80s and 90s locally to 100 in southeast Oregon and Columbia Basin.	West of Cascades: 30 to 40% except 20 to 30% in southwest interior Oregon. East of Cascades: Dry. Mostly 7 to 15%.	Generally westerly increasing to 5 to 15 mph in the afternoon.
ROCKY MOUNTAIN AREA Isolated afternoon wet/dry thunderstorms over central mountains and Front Range of Colorado, central Wyoming and Black Hills.	Highs in the upper 80s and 90s, with 70s and 80s in the mountains.	10 to 22%, except 25 to 45% eastern plains and higher elevations.	Southern winds 5 to 15 mph in eastern plains, with 5 to 18 mph elsewhere.

<p>SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog coastal areas, otherwise mostly sunny over Central California and partly cloudy over Southern California with isolated afternoon showers and thunderstorms over the mountains and deserts.</p>	<p>75 to 85 coastal areas. 85 to 100 mountains. 95 to 105 valleys. 95 to 105 upper deserts. 105 to 115 lower deserts.</p>	<p>10 to 20% valleys 8 to 15% mountains 10 to 20% deserts.</p>	<p>Southeast to southwest 10 to 20 mph.</p>
<p>EASTERN GREAT BASIN Idaho, Bridger-Teton: Mostly sunny and hot with light winds. Isolated dry thunderstorms mountains of eastern Idaho, western Wyoming, and in the Salmon-Challis. Utah, Arizona Strip: Partly cloudy and hot with strong gusty winds near storms. Isolated to widely scattered wet and dry thunderstorms.</p>	<p>Idaho, Bridger-Teton: 70 to 84 mountains, 85 to 98 valleys. Utah and Arizona Strip: 77 to 91 mountains, 87 to 103 valleys.</p>	<p>Idaho, Bridger-Teton: 16 to 26% western Wyoming, 8 to 21% elsewhere. Utah, Arizona Strip: 10 to 26% mountains, 5 to 15% valleys.</p>	<p>Idaho, Bridger-Teton: Light and variable winds 5 to 10 mph. Utah, Arizona Strip: Light and variable winds 5 to 10 mph except strong gusty winds near storms.</p>
<p>WESTERN GREAT BASIN AREA Isolated thunderstorms south and east-central, sunny north and west with breezy afternoon winds</p>	<p>North: 85 to 99. South: 92 to 103. Mountains: 75 to 90.</p>	<p>South Valleys: 10 to 20%. North Valleys: 5 to 15%. Mountains: 15 to 30%.</p>	<p>North: SW at 10 to 20 mph with localized gusts 25 to 30 mph. South: S to SW at 10 to 15 mph.</p>
<p>NORTHERN CALIFORNIA AREA Mostly clear except for night and morning coastal low clouds and fog.</p>	<p>60s to low 70s coast, with the warmer inland valleys in the upper 90s.</p>	<p>10 to 20% drier inland areas.</p>	<p>Southwest to northwest 4 to 12 mph.</p>
<p>Northern Rockies Partly cloudy with a chance of isolated dry thunderstorms north Idaho and northwest Montana.</p>	<p>Lower 90s low elevations to mid 80s higher terrain.</p>	<p>15 to 25 percent.</p>	<p>West portion: Southwest 5 to 15 mph. East portion: Southeast 5 to 15 mph.</p>

TRANSFER OF COMMAND

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents with potential during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

● Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.

● Mitigation actions to take:

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
